

MIDWEST METAL PRODUCTS, INC.

Engineering & Design Services

14-piece assembly transformed into single-piece casting gear box.

- 14 pieces to assemble - high labor hours to create the part.
- Large volume of material milled out of thick plate for 2 of those parts.
- Well over 250 inches of weld bead to be applied to join all the sections.
- Potential part-to-part variation from the application of the weld.
- Potential stress deformation of part during fabrication, and a need to stress relieve after fabrication.
